Uppsala den 15 juni 2023

AGENDA

- Who are we?
- What is the Framtidskortet?
- Short film: *“A conversion with the support of the Framtidskortet.”*
- Summary; this is the Framtidskortet

Who are we?

We are Börje Lindqvist and Agneta Andersson career counselors with many years of experience from various forms of schooling, including university.

We have a great interest in developing guidance and have for a long time worked with e-guidance in various forms.

Today, together with Lars Hugsén, we are coordinators for Framtidskortet.

Framtidskortet is jointly owned by Luleå, Norrtälje and Karlshamn municipality and is run without a profit interest.

Framtidskortet

för dig som arbetar med samtal

Framtidskortet is a clientcentric tool that contributes to improved quality and greater efficiency in the guidance process. It is a complement to the guidance conversation. By sorting digital decks of cards, the client prepares at his own pace, regardless of time and place.

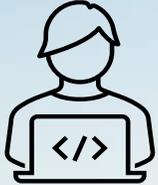

The decks of cards can be about professions, skills, training or whatever suits your function.

Framtidskortet - A Four-Step Digital Process

4. The follow-up of the results takes place in a digital or physical meeting between the counselor and the student. In the response view, we can sort, prioritize, and comment on the results. The result can be exported to various formats or to the integrated whiteboard for a more flexible surface. As a conclusion, the student can receive a summary through a unique link.

3. The counselor prepares for the follow-up meeting with the support of the Framtidskortets response view, where the student's results have been captured.

2. The student answers questions in the card deck. It can be image and text questions with answer options or open-ended questions that are supplemented with information cards.

For each card, you can link to a text with explanation, an external link, or a video.

The student then receives an email with the result of their answers (sorting) as well as an invitation to a follow-up meeting.

1. The user (the counselor) selects which decks of cards to include in the mailing that the respondent (the student) will answer. The mailing is sent as a link to the student.
